

Mohd Meraj Ansari

Engineering Student

I am a dedicated and curious problem-solver who is eager to learn and contribute to innovative projects. With a basic foundation in programming concepts and passion for coding

Projects

Customer Review Analysis for Airlines.

November 2022 - Present

- Know a day as there are many airlines in the business it is very confusing to select airlines to fly, here your sentiment analysis comes into picture.
- In this project we use textblob library for sentiment analysis.
- The end goal is to provide user-friendly, accessible and effective dashboard for customer review and identifying spam reviews for airlines.

Old Car Price Prediction

August 2022 – November 2022

- Every one has a dream to buy car but unfortunately we can't buy new car hence we go for used car here your model come into picture to predict the cost of used car based on their year of manufacturing, model, KM driven, etc.
- In this project we used linear regression and random forest for predicting the price.
- The end goal is to provide user with the most accurate cost of the used car based on the attribute.

Blog Website

May 2022 –August 2022

- To represent you thoughts and vision we use blog website.
- In this project we use React.js for front-end and Node.js for back-end and MongoDB for database.
- The end goal is to provide user-friendly, fast, responsive, and scalable platform for reading and writing blog posts.

Certificates
